

Innovations in small joint arthroscopy

For precision products in small joint arthroscopy, turn to the world leader in arthroscopic surgery—Smith & Nephew Endoscopy. Smith & Nephew offers an extensive line of products for surgery in the wrist, elbow, and ankle.

Shaver Blades and Shaver Systems

Variety of 2.0 mm, 2.9 mm, and 3.5 mm mini blades and burrs that are ideal for small joint applications. In addition, the DYONICS® POWER Shaver System has a unique blade recognition feature that automatically senses the type of shaver blade and sets the system to a programmed speed range for optimal performance and safety.

Radiofrequency Probes

Extensive line of maneuverable, micro-sized radiofrequency ablation, cutting, and temperature control probes expand access to a variety of small joint procedures.

Micro Instruments

Designed to provide maximum grasping and resecting capability, and excellent maneuverability for easy access to small, tight joints. Pinless hinge design provides durability and reliability.

2.5 mm suction punch offers the dual convenience of resecting tissue while simultaneously evacuating through a suction channel in the instrument.

Arthroscopes and VideoArthroscopes

Wide angle 1.9 mm and 2.7 mm diameter arthroscopes supply the versatility required for access and visualization in small joint spaces. Autoclavable scopes available.

Suture Anchors

Smith & Nephew offers the secure solution for soft tissue fixation. MINITAC[®] Ti 2.0 and TWINFIX[®] Ti 2.8 HS anchors provide superior pull-out strength. Shorter inserter shaft gets the surgeon's hands closer to the surgical site. Available with and without needles.

TFCC Repair System

The TFCC Mender Disposable Suture System facilitates repair of peripheral lB tears. Straight and curved needles along with a patented wire loop allow for easy passage and retrieval of sutures.

MICRO VECTOR[®] Drill Guide System

A targeting and insertion system specifically designed for small joint procedures. Allows the arthroscopist to easily establish a precise path for cannulated drills and/or cannulated fixation pins and screws.

Guhl Non-Invasive Ankle Distractor

With the non-invasive ankle distractor, distraction is easy to monitor, maintain, and adjust during the procedure. The distractor is easy to set up and is designed to accommodate different ankle and table positions.

ECTRA[®] II Carpal Tunnel Release System

The ECTRA II System permits the surgeon to access and release the carpal ligament endoscopically with complete visualization and control. ECTRA knives allow the surgeon to determine both the direction and degree of cut. A slotted cannula permits access to the ligament via two portals—this allows cutting from either the distal or proximal end while minimizing lens fogging. ECTRA II can also be used for plantar fascia release.

Ordering Information**

Sterile Disposable Mini Blades and Burrs

3606	2.9 mm Cutter (beige)
3407	2.0 mm TURBOWHISKER° (yellow)
3418	2.9 mm TURBOWHISKER (green)
3410	2.0 mm Full Radius (blue)
3419	2.9 mm Full Radius (red)
3553	2.9 mm Barrel Abrader (purple)
3530	2.9 mm Abrader (orange)
3819	3.5 mm Abrader (aqua)
4224	3.5 mm RAZORCUT° (pink)
7209065	2.9 mm INCISOR° (lime green)
4225	3.5 mm INCISOR (turquoise)
7210486	3.5 mm BONECUTTER (beige)

Shaver System

7205357	Mini-Motor Drive
---------	------------------

Radiofrequency Probes

7209656	Micro ABLATOR Probe
7209641	Micro ABLATOR-S Probe, suction
7209645	Micro LIGAMENT CHISEL° Probe, angled
7209644	Micro LIGAMENT CHISEL Probe, curved
7209643	Micro LIGAMENT CHISEL Probe, hook
7209632	Mini TAC°-S Probe
7209631	Micro TAC-S Probe
7209629	Micro TAC-S Probe, angled
7209706	VULCAN° Generator System

ECTRA° II System

4143	ECTRA II System, 35 mm
4149	ECTRA II System, Direct View
4116	ECTRA II Disposable Kit

Cannula Sets

4294	2.2 mm Operative Cannula Set
3800	2.9 mm Operative Cannula Set
4317	3.6 mm Operative Cannula Set
4525	INTELIJET Inflow Cannula Set, 2.7 mm

Micro Instruments

7207868	Micro Instrument System
7207598	Micro Graspers, straight
7207599	Micro Graspers, up 10°
7207600	Micro Punch, straight
7207601	Teardrop Punch, right
7207602	Teardrop Punch, left
3312	Probe
3499	2.5 mm Straight Suction Punch
7207935	Sterilization Tray

Suture Anchors

7209169	MINITAC° TI 2.0, #3-0 Preloaded Sutures
7209368	MINITAC TI 2.0 with Needles
7209168	TWINFIX° TI 2.8 HS, #2-0 Preloaded Sutures
7209365	TWINFIX TI 2.8 HS with Needles
7209162	1.8 mm Drill for 2.8 mm HS anchor
7209117	Drill Guide for 2.8 mm HS anchor
7209166	12" Suture Passer

Ankle Distraction

7207079	Guhl Non-Invasive Ankle Distractor System
014407	Sterile Ankle Distractor Foot Straps

Drill Guide

4314	MICRO VECTOR° Drill Guide System
------	----------------------------------

VideoArthroscopes

3768	2.7 mm, 30°
3863	1.9 mm, 30°
7205929	2.7 mm, 30°, autoclavable

Direct-View Arthroscopes

3947	2.7 mm, 30°
4184	1.9 mm, 30°
7205682	2.7 mm, 30° autoclavable

TFCC Repair System

7210752	TFCC Mender Disposable Suture System
